

BEN NATHAN

E Source

Ben Nathan leads E Source's research and advisement to utilities on energy affordability and equity. He specializes in identifying and sharing leading strategies and fostering collaborations to assist utility industry clients in their efforts to better serve income-qualified and other vulnerable populations. Before he joined E Source, Ben worked at the US Department of Energy, US Environmental Protection Agency, and the National Renewable Energy Lab, where he assisted federal, state and local government and tribal partners in clean energy planning and air and water protection. Ben received a bachelor's in geography from George Washington University and a master's in city, urban, community, and regional planning from the University of Pennsylvania.
